Indore, Madhya Pradesh

Mahesh Pawar

ANGULAR DEVELOPER

EDUCATION

Bachelor of Engineering – Mechanical

RGPV University: 2015–2019

Intermediate

MP Board : 2013–2014

Secondary School Education

MP Board : 2011–2012

SKILLS

- Angular, Restful API Integration
- HTML5, CSS3, Bootstrap, Angular Material and Kendo UI
- NodeJS
- MongoDB

LANGUAGES

- English
- Hindi
- Marathi

PROFILE

Software Developer with 3 years of experience in MEAN Stack development, specializing in JavaScript, TypeScript, Angular, and Node.js. Currently working at Guardians Infotech and aiming to transition into a Full Stack Developer role to build scalable and efficient web applications..

Key Skills:

- **Programming Languages:** JavaScript, TypeScript
- **Web Technologies:** HTML5, CSS3, Bootstrap 4
- **Frameworks & Libraries:** Angular, NodeJs, Angular Material, Kendo UI,
- **State Management:** RxJS
- **Version Control:** Git, GitHub

Collaborative Experience:

Experienced in delivering scalable, user-centric web apps with cross-functional teams. Aligns technical solutions with business goals, ensuring seamless API integration and responsive design.

EXPERIENCE

Guardians Infotech

January, 2024 – Present

Project: Invoice Trade

Role: MEAN Stack Developer

Technologies: Angular, NestJS, MongoDB, Docker, Firebase

- Developed a scalable invoice financing platform using Angular and NestJS, ensuring a modular and maintainable architecture.
- Designed and implemented secure RESTful APIs with JWT authentication and role-based access control (RBAC).
- Containerized the application using Docker for seamless deployment and efficient scaling.
- Integrated Socket.IO for real-time invoice updates and live notifications.
- Implemented push notifications using Firebase Cloud Messaging (FCM) to enhance user engagement.
- Optimized API performance for real-time invoice processing and integrated third-party payment gateways.

TRAINING

Digiholic Infotech Jan 2021 – Jun 2021

Completed training as an Angular Developer, gaining practical experience in building responsive web applications, enhancing front-end functionality, and following industry best practices with the Angular framework

Project: BankProps

Role: Angular Developer

Technologies: Angular, Bootstrap, Swagger, Postman

- Developed a suite of reusable Angular components, optimizing development efficiency and consistency.
- Implemented token and loader interceptors, authentication guards, and role-based security throughout the application.
- Developed a fully functional web application for property transactions across India.
- Conducted code reviews to improve code quality, reduce redundancy, and ensure maintainable architecture.
- Utilized route guards and lazy loading to ensure secure access and optimize application performance.

MoreYeahs Inc.

July 2021 – April 2023

Project: DigiSparsh

Role: MEAN Stack Developer

Technologies: Angular, Express.js, MongoDB, RabbitMQ, Azure Services, GCP Migration.

- Developed a scalable and modular web application using Angular for the frontend and Express.js for backend services.
- Implemented MongoDB for efficient data storage and optimized queries for better performance.
- Integrated RabbitMQ for reliable and asynchronous message queue processing.
- Utilized Azure Services for cloud-based authentication, storage, and deployment.
- Worked on GCP migration, ensuring smooth transition and optimization of cloud resources.
- Enhanced API security and authentication mechanisms using JWT and role-based access control.
